Work Experience

February 2009 to Present - **Freelance Graphic and Sound Designer** at Miharo Games, NYC

I have been creating 3D models and textures of 4 Miharo's main release game titles. I also contributed to some of the game design ideas and marketing decisions. I've created sound effects and compose the music for all of their games and applications. At the same time, offered my web design knowledge creating contest registration forms and set up the Miharo Games Online Store using PHP.

*November 2008 to February 2009 - **Production Artist** at Sonic Boom Games, NYC*

Designed graphic material for computer games and mobile applications. I was also the main artist for all of the company's marketing designs. I was involved in the main marketing campaigns to provide high quality graphics. This position also involved the resizing of game assets, designing PowerPoint documents, designing web banners, creating product campaigns for Verizon, Coca-Cola, Red Bull and Heineken.

*February 2008 to November 2008 - **Graphic Designer** at FXCM, Forex Capital Markets, NYC*

I was the lead artist for 2 of the company's mayor products, DailyFX and Trading Signals web pages. Taking the critical design decision to place them above the company's competitors. Also designed web pages to reside in the company's multi-language site. Designed and resized banners to be place inside the internal sites as well as external. Some of the external sites include CNN Money, Bloomberg and CNBC.

*September to December 2007 - **Content Management Intern** at VH1.com / MTV Networks, NYC.*

Input video content into the vh1.com site database. Selected and retouched up to 130 pictures a day to be used in the Blog and Photo department of the site. Also video syndications with MTV's main content management software, for the content that was displayed in the vh1.com media player.
